The ‘Cameroonian association of engineers and computer scientists’ mostly known as VKII (German contracted denomination) was founded in 2000 at Frankfurt. Prior to its creation, the increasing number of engineers and computer science students from this part of Africa which lives in Germany desired to establish an association which could help to improve their status in German universities as minor community.

Channelling talents of cameroonian engineers and computer scientists:
- Development and implementation of development-oriented projects.
- Technology and knowledge transfer.
- Promotion of research activities
- Use, preservation and protection of natural resources for a sustainable development in Cameroon.
- Contribution to an establishment of technological institutions in Cameroon.
- Development of technical educational systems with international standard.

Since then, the number of Cameroonian alumni has drastically increased. Today, the fledging group has gained momentum to the extent that it brings together the highest number of Cameroonian students and professionals in Europe. The association represents the everlasting burning desire to achieve success in a competitive society and improve the quality of life for Cameroonians. The VKII is recognized by the German law as non-profit, non-political and a civil organization. It was built up from the grassroots to relieve the difficulties that students, alumni as well as technicians encounter in their various professions. Furthermore, the association promotes Excellency within the community. For e.g. recently the best graduates of the year have just been rewarded for their contribution by way of their master thesis. By doing so, various talents of the community are known, motivated and empowered.

Clean City & Clean Energy

Company name: Clean² = Clean city * Clean energy
Established date: 01.01.2017
Registered status: Project
Head Office: Grethe-Jürgens-Str. 44 (Germany)
Number of Employee:
Number of Subdivisions:
Subdivisions location(s):
Founding Sources:
Business Volume: 200.000 €

OUR VISION

Clean² (Clean city * Clean energy) is a project with the main objective to introduce the biogas business and technology in Cameroon. By collecting and fermenting various household, public institution and industrial wastes the resulting biogas is converted into electricity and heat, which together with the by-product bio-fertilizer, will be placed on the market.

The vision of Clean² project is the vulgarization of biogas technology and renewable energy in general in Africa.

The project is built in 4 main phases: Individual small biogas solutions for off-grid/rural supply, biogas solution with circular economy for the agricultural industry, establishment of a competence and formation center, further huge biogas technologies and internationalization.

For the first phase and as market access strategy a company has been established in Germany Mek:EnergyBio UG, working in strategic partnership with a local company in Cameroon (WeeY Energies et Eau) in the field of renewables energy (solar and biogas).

SERVICE(S) DESCRIPTION

• Home biogas units
• Bio-toilet based on biogas
• Circular economy (waste - power - heat - gas - fertilizer)
• Proposal of energy autonomy and environmental protection, based on the construction and operation of Biogas units, for companies and other customers generating organic waste
• Equipment for solar water pumps
• Solar Home System (SHS)
• Solar generator

COMPANY TARGETS

Private residence, rural electrification, Hotels, Restaurants, Farmers, Breeders, Bakeries, Processing and transformation industries.

CLIENT PORTFOLIO

• Households
• SME
• Industry

SAFETY, HEALTH, AND ENVIRONMENTAL POLICIES

• Pollution reduction in urban, peri-urban and rural communities
• Reduction of the use of firewood and thus an implicit fight against deforestation
• Solution to the problem of hygiene and sanitation by replacing the use of septic tanks, source of several diseases in our towns and villages.
• 100% clean, renewable and CO2 neutral energy supply

HISTORY, EXPANSION, AND GROWTH

The partner WeeY has over 5 years experience in the solar business in Cameroon. Possible to expand to a big renewable company according the Clean² strategy.

AWARDS / CERTIFICATIONS / RECOGNITIONS

Award and participation to the program “Business Idea for Development” from GIZ/CIM

Easy Biotech
Company name: Easy Biotech
Established date: 18.02.2019
Registered status: SARL
Head Office: Rond-Point Express - Yaoundé (Cameroon)
Number of Employees: [Number]
Number of Subdivisions: 2
Subdivisions location(s): Rond-point Express, Yaoundé & Vallée de Bessengué, Douala
Founding Sources: [Founding]
Business Volume: [Volume]

OUR VISION
Many diseases, including lots of cancers for example, which started innocently, become fatal very quickly due to a lack of reliable, rapid, effective and, above all, affordable medical diagnosis.

Easy Biotech is a platform now available in Cameroon that focuses on medical diagnosis based on the latest and most advanced German medical technologies. Its utmost mission is to provide Cameroonian with innovative (preventive and curative) diagnostic solutions through an exclusive partnership with Europe’s best medical laboratory located in Germany and having the largest network of best medical specialists in Europe.

Easy Biotech’s areas of expertise cover all medical fields. You are therefore granted full access to biochemistry, haematology, molecular oncology, anatomy-pathology, genetics, and many others. The special feature of the company is that all medical analysis are carried out in Germany, in an average turn-around time of 2 to 5 days, thereby guaranteeing all our customers and patients the best quality/price ratio for medical diagnosis.

SERVICE(S) DESCRIPTION
Easy Biotech provides full innovative (preventive and curative) diagnostic solutions through an exclusive and strong partnership with Europe’s best medical laboratory based in Germany, thereby granting medical doctors and patients in Cameroon full and direct access to the largest network of best medical specialists in Europe.

Your samples are collected either at the client’s location or at ours, and subsequently send to Germany in the best IATA-conform conditions. Samples are then immediately processed upon reception in Germany, and reports are transmitted to the clients couple of days after, preferably per eMail.

COMPANY TARGETS
• Individuals
• Company
• Hospitals
• Medical laboratories

CLIENT PORTFOLIO

SAFETY, HEALTH, AND ENVIRONMENTAL POLICIES
Easy Biotech emphasises on medical data protection of patients, in accordance with the new Europeans laws on personal data protection. We also do select and train our medical co-workers to work in the strict respect of the most recent GLPs.

Saheloo

OUR VISION

Make French-speaking sub-Saharan Africa more accessible through geomatics tools based on mapping, basic processing and geolocation.

Founded in January 2016 in Munich, Saheloo was created with the philosophy of making Sub-Saharan Africa more accessible through applications based on geolocation, route optimization and mapping.

Its founder Willy Claude Makend, anxious to change the way people move around cities and explore the continent, decided to launch the start-up.

At Saheloo we create superb maps (Administrative, habitat for example), provide location data, GPS navigation systems and APIs explained to developers.

The name Saheloo is a promise that originates from SAHEL, which are lands directly south of the Sahara. Saheloo expresses quality with a spirit of research, for a better life in Sub-Saharan Africa.

SERVICE(S) DESCRIPTION

Leading geospatial data and technologies: Our geomatics team is experienced in specialized image processing techniques, geographic information system (GIS), global positioning system (GPS), geodesy and provides device extraction and satellite image data supplementation to a wide range of industries.

COMPANY TARGETS
